

Proactive Gun Detection and Comprehensive Emergency Communication

The integration of ZeroEyes and CrisisGo provides schools with a powerful solution to detect and respond to firearm threats instantly. ZeroEyes' cutting-edge AI-based technology continuously monitors video feeds to identify firearms in real-time. Once a threat is detected, the information is immediately communicated to CrisisGo's platform, turning security cameras into proactive tools for preventing potential incidents.

PROACTIVE THREAT DETECTION

ZeroEyes stands out with its advanced AI capabilities, designed specifically for real-time firearm detection. Our technology ensures that threats are identified the moment they appear, providing crucial seconds to initiate emergency protocols and protect lives.

Instant Threat Detection

ZeroEyes' AI technology continuously scans video feeds, detecting firearms with unprecedented speed and accuracy.

Automated Alerts

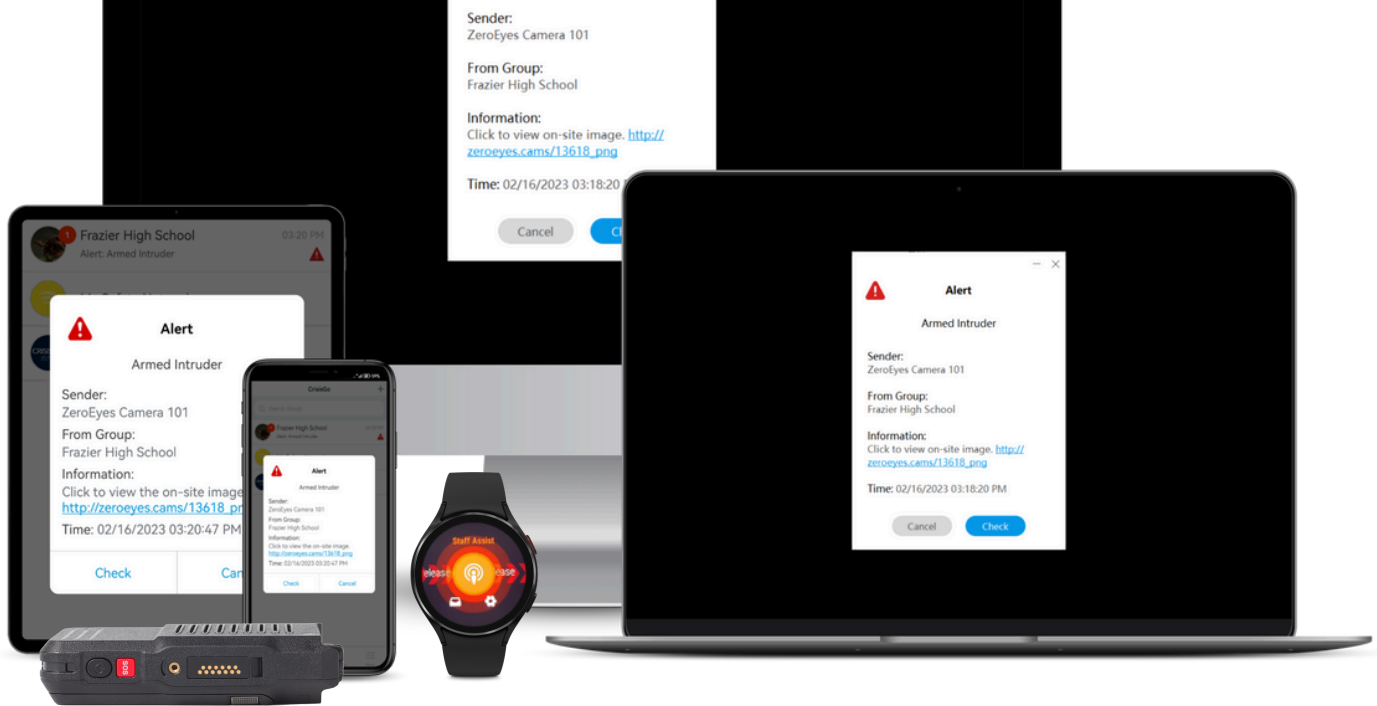

Upon detection, alerts are sent instantly to CrisisGo, ensuring that safety teams and first responders are notified without delay.

Enhanced Proactive Measures

By turning cameras into proactive tools, ZeroEyes adds a critical layer of security to any institution's safety infrastructure.

Verified Threat Detection

ZeroEyes verifies every detection in their ZeroEyes Operation Centers (ZOCs), staffed 24/7 with former military and law enforcement veterans to ensure accuracy of detection and dispatch of alert.

THE HUB OF EMERGENCY COMMUNICATION

CrisisGo serves as the central "hub" for alerting and emergency communication, seamlessly integrating with ZeroEyes to enhance the overall response to threats.

Comprehensive Alert System

Users can receive alerts through multiple channels, including web links, ensuring that no one misses critical information.

Robust Features Without an App

Even without downloading the CrisisGo app, users can access essential features like staff check-in, rosters, evacuation routes, and more through our Safety Client.

Enhanced Mobile Capabilities

Alert senders can share their location, audio, images, and video, providing detailed context for safety teams and first responders.

Smart EOC Dashboard

Safety teams and first responders can access live video feeds and images, with camera locations clearly visualized on an interactive digital map.

INTEGRATION BENEFITS:

Increased Safety

ZeroEyes' real-time detection combined with CrisisGo's comprehensive communication tools ensures a rapid and effective response to threats.

Faster Response Times

Automated alerts and coordinated communication reduce the time it takes to address potential threats, enhancing overall safety.

LEARN MORE ABOUT ZEROEYES & CRISISGO

Detect. Notify. Manage.

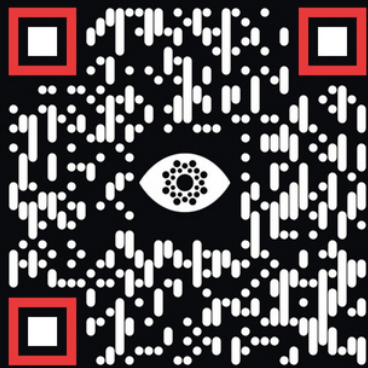

Detect threats instantly and know when a gun is detected using AI-powered software integrated with existing cameras in your school.

Notify Everyone

Automatically initiate text, audio, and visual alerts when a threat is detected and deliver to wide range of devices, including IP speakers, desk phones, overhead paging, digital signage, desktop computers, and mobile phones.

Manage Incidents

Utilize a full suite of incident management tools to help handle incidents from start to finish with real-time insights, virtual collaboration and more.
