ZEROEYES™

DHS SAFETY Act

DESIGNATED
SAFETY ACT
www.safetyact.gov

SAFETY Act Designation is granted by the U.S Department of Homeland Security to technologies proven effective in mitigating terrorism risks.

Companies using the tech during terrorist attacks receive significant legal liability protection.

Proven

As a DHS Safety Act Designee, ZeroEyes' visual AI gun detection technology has proven successful in real-world environments.

Quality

ZeroEyes passed internal and external audits, received favorable customer feedback, and has a documented quality assurance plan.

Reliable

Our technology is repeatedly proven to perform as intended with consistent positive results and a high level of reliability.

Trusted by Organizations Nationwide

DHL

Littleton Public Schools

RIVER SPIRIT CASINO RESORT

SUBARU

RENASANT CONVENTION CENTER

Background

As part of the Homeland Security Act of 2002, Congress passed the Department of Homeland Security (DHS) Support Anti-Terrorism by Fostering Effective Technologies (SAFETY) Act to save lives by aiding in the development of new technologies to detect, prevent, and mitigate the effects of terrorist attacks. Products are reviewed by an unbiased panel of experts from federally funded research and design centers, non-profits, national labs, and academia.

Fighting Terrorism

Mass shootings at the Pulse Nightclub in Orlando, Florida and the Inland Regional Center in San Bernardino, California were both found to be acts of terrorism.

During both incidents at venues with CCTV systems, shooters carried visible rifles from the parking lots into the buildings where the terrorist attacks happened.

Being Designated

ZeroEyes' visual AI gun detection technology has:
- Proven, successful testing in real-world environments
- Internal and external audits
- Favorable customer feedback
- A documented quality assurance plan
- Technology that is repeatability proven to perform as intended with consistent positive results and a high level of reliability

☑ Department of Homeland Security SAFETY Act Designation

☑ Patented technology is verified by humans to mitigate or eliminate false alerts

☑ Founded, owned, and operated by Navy SEALs veterans

☑ Serving businesses, schools, and government facilities in most states
