

Protect Your Healthcare Facilities

Combat gun-related violence and mass shootings with AI-powered, human-verified gun detection software.

Hackensack Meridian Health

ZeroEyes Helps Protect Employees & Patients from Gun Violence

ZeroEyes' proactive visual A.I. software integrates with existing digital security cameras and is solely focused on object detection—never facial recognition or personally identifiable information.

Why Choose ZeroEyes

- Department of Homeland Security SAFETY Act Designation
- Founded, owned, and operated by Navy SEALs veterans
- Patented technology is verified by humans to avoid false alerts
- Serving facilities in 40+ states

Our goal is to ensure our healthcare team and patients feel safe and are safe... we are very impressed by the quality and speed of ZeroEyes' response to threats.

Mark Funderburk
CEO, UMC Health System

Save Time. Save Lives.

- Integrates into existing digital security cameras
- Non-invasive AI gun detection
- Actionable intelligence for first responders

Challenge

Hospitals are often large with many divisions and thousands of hallways and doors—making it difficult to locate the shooter and wounded victims.

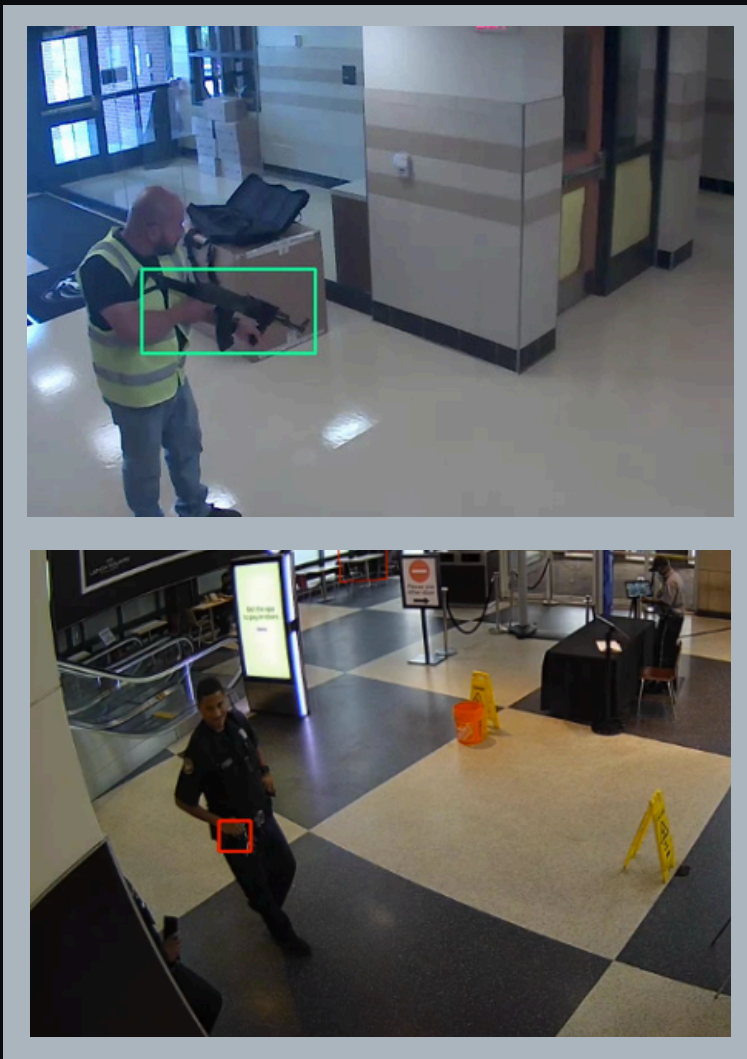

Hospitals may lock down wings that the shooter has not reached... but without accurate intel, can they confidently lockdown or barricade sections off?

Solution

With ZeroEyes, first responders get real-time intelligent situational awareness, including the shooter's geolocation, photos, and direction of travel.

When you know exactly where the shooter is located, you can make effective decisions about which sections you should lock down or evacuate.

Get Started With ZeroEyes

- Software integrates into your existing digital security cameras
- More affordable than metal detectors, acoustic gunshot detection, or concealed weapons sensors
- Quick remote or on-site installation process
- Easy-to-use desktop and mobile interface
