

Brandished Gun Detection in Places of Worship

Keeping houses of worship, community centers, and other religious institutions is increasingly important as hate crimes are on the rise.

Faith Under Fire

Since the mid-2000s, mass shootings in churches, temples, synagogues and mosques have become more frequent, and are increasingly committed by perpetrators with a history of racism and racial bias.

An Elegant Solution

The failures of the three most common approaches to preventing mass church shootings are efficacy (gun-free zones), optics (on-site security) and ethics (armed congregants).

Reclaim Safety

ZeroEyes discreetly helps prevent mass shootings by seamlessly integrating with existing security cameras. It instantly notifies local 911 and first responders the moment a gun is visually detected on your premises. UPDATE

Save time. Save lives.

Partnering with Religious Organizations

ZeroEyes is proud to work with religious organizations including houses of worship, community centers, childcare facilities, and schools.

“We chose ZeroEyes because of their exceptional capabilities and customer service.”

– Scott Braswell, CEO of The Merage JCC of Orange County

Secure Sacred Spaces

When it comes to protecting congregations from mass shootings, ZeroEyes serves everyone.

Founded by Navy SEALs and elite technologists who are Department of Homeland Security SAFETY Act Designation recipients—we’re here to help restore physical and emotional security in places of worship.

Religion is the motivating factor in 13.3% of hate crimes.
