

# PROTECT YOUR HEALTHCARE FACILITIES

Combat gun-related violence and mass shootings with AI-powered, human-verified gun detection software.

Integrates into existing digital security cameras

Non-invasive AI gun detection

Actionable intelligence for first responders

## ZEROEYES' SOLUTION HELPS YOU MAINTAIN HIPAA COMPLIANCE

ZeroEyes' proactive visual A.I. software integrates with existing digital security cameras and is solely focused on object detection—never facial recognition or personally identifiable information.

Our exclusive focus on weapons protects sensitive patient information for HIPAA compliance without sacrificing security effectiveness.

- Department of Homeland Security SAFETY Act Designation
- Founded, owned, and operated by Navy SEALs veterans
- Patented technology is verified by humans to ensure no false alerts
- Serving businesses, schools, and government facilities in 40+ states

## CHALLENGE

Hospitals are often large with many divisions and thousands of hallways and doors—making it difficult to locate the shooter and wounded victims.

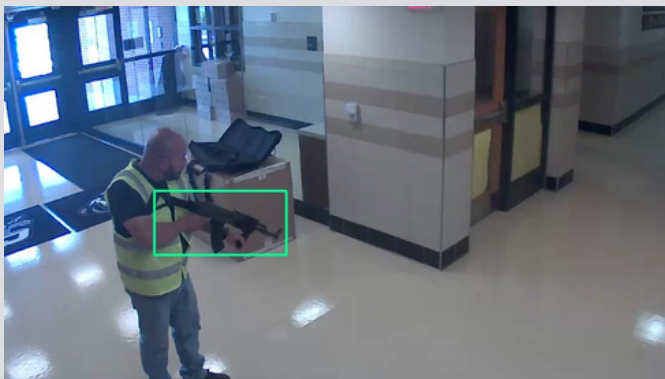

Hospitals may lock down wings that the shooter has not reached... but without accurate intel, can they confidently lockdown or barricade sections off?

## SOLUTION

With ZeroEyes, first responders get real-time intelligent situational awareness, including the shooter's geolocation, photos, and direction of travel.

When you know exactly where the shooter is located, you can make effective decisions about which sections you should lock down or evacuate.

## GETTING STARTED WITH ZEROEYES

- Software integrates into your existing digital security cameras
- More affordable than metal detectors, acoustic gunshot detection, or concealed weapons sensors
- Quick remote or on-site installation process
- Easy-to-use desktop and mobile interface
