ZeroEyes with InformaCast Integration

- A.I.-powered, human-verified gun detection software that works with existing video surveillance cameras.

- Detects brandished guns, verifies the firearm, and dispatches an alert in as little as 3-5 seconds.

- Provide authorities and first responders with critical information including location, weapon type, and description.

About InformaCast

With a single, consolidated system, you'll save time and money and deliver consistent messaging across multiple channels.

InformaCast is a platform for your emergency and daily communication needs that enables you to reach everyone with the technology your organization already has in place. Our notification system will deliver intrusive, attention-getting audio, text, and visual alerts throughout your facility and to people's mobile devices.

Our Partnership

Together, the integration ties ZeroEyes' physical security platform to InformaCast's mass notification and incident management solutions to keep students, teachers, employees and visitors safe throughout their facilities.

This leads to increased speed in detecting an incident, notifying everyone in the area, and managing the situation through its resolution.
