

Partners in School Safety

ZeroEyes and GeoComm technologies combined offer a comprehensive **visual gun detection** and **mapping** solution for emergency situations.

ZeroEyes provides industry-leading visual weapons detection and is the **only** technology of its kind that integrates GeoComm indoor mapping and is DHS Safety Act approved.

About GeoComm

Advanced GIS & Customizable Maps

Provides accurate, real-time location data with tailor-made map layers for first responders.

Seamless Integration

School maps are securely shared with applications in use for public safety, including software used by 911 dispatchers, first responders, and school safety professionals.

About ZeroEyes

Real-Time Gun Detection

ZeroEyes' next-gen AI technology detects illegally brandished guns with your existing surveillance cameras, quickly identifying potential threats.

Human Verified Alerts

When guns are detected, ZeroEyes' analysts (all U.S. military and law enforcement veterans) verify the threats and send alerts to your team and law enforcement as quickly as 3-5 seconds.

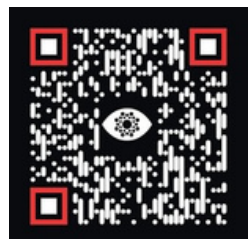

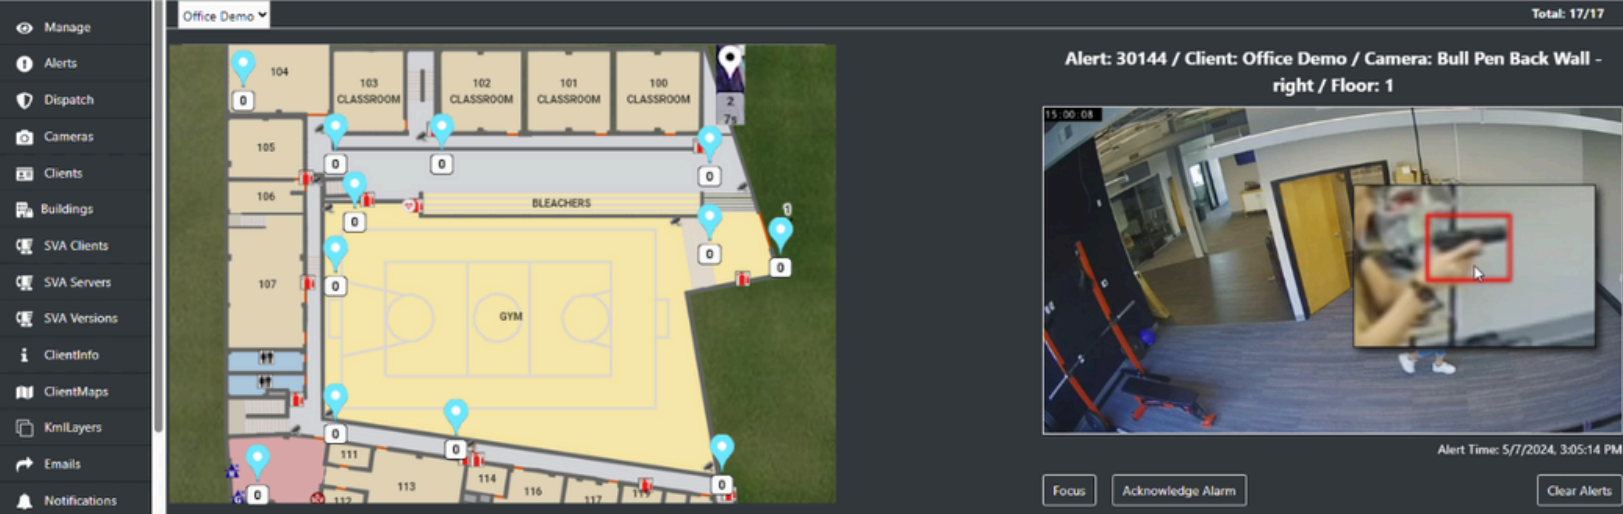

Learn more about integrating ZeroEyes AI-powered, human-verified gun detection with your GeoComm mapping system for a safer campus.

About Integration

GeoComm–ZeroEyes integration enhances situational awareness by delivering emergency responders with real-time mapping of potential threats—providing more **efficient** response coordination.

By merging visual threat data with geospatial information, the combined solution allows for quicker and more informed decision-making, **saving crucial moments when it counts.**

Visualize a Safer School Year

Challenge

Campuses are large, making it difficult to locate and detain threats.

Many active shooter incidents occur outside.

It's hard to get accurate information during an incident due to chaotic conditions.

Solution

First responders get real-time data, including the threat's geolocation and photograph.

Gun detection software can be installed on indoor and outdoor security cameras.

ZeroEyes provides 24/7/365 human-verified gun detection, alerting local law enforcement as quickly as 3-5 seconds.
